FUTURA TERRITORIES

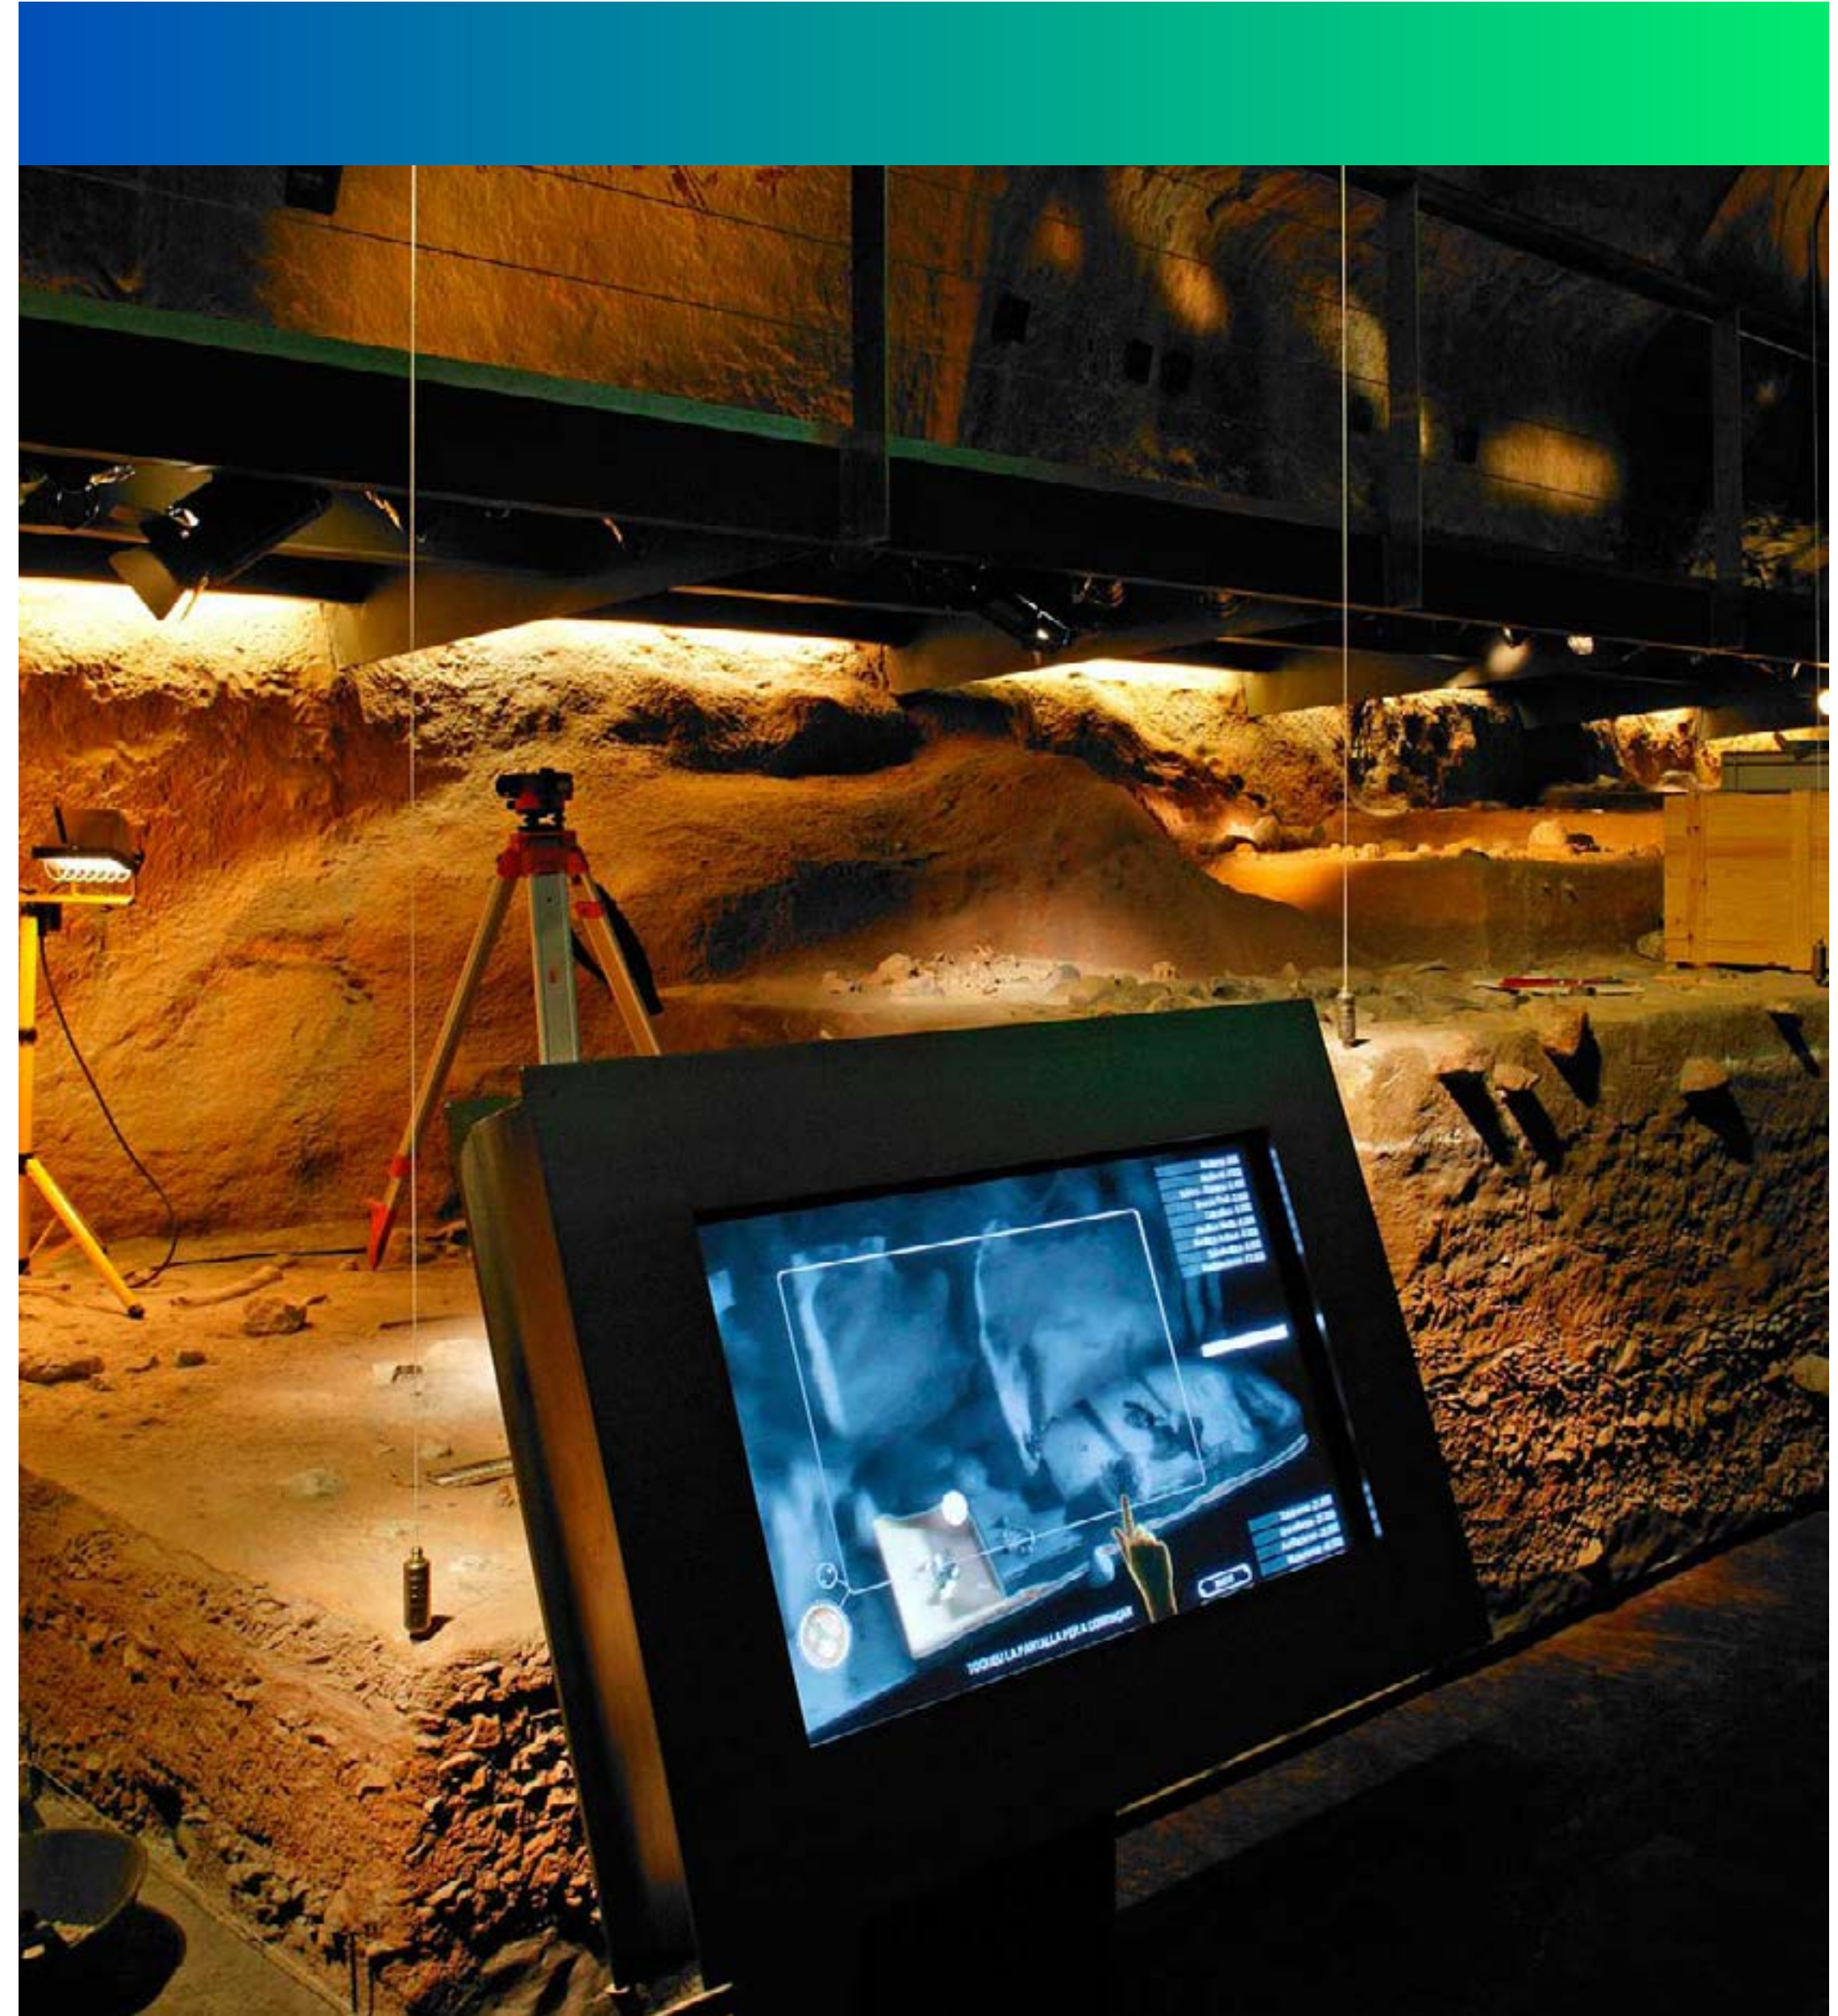

ALICANTE FUTURA

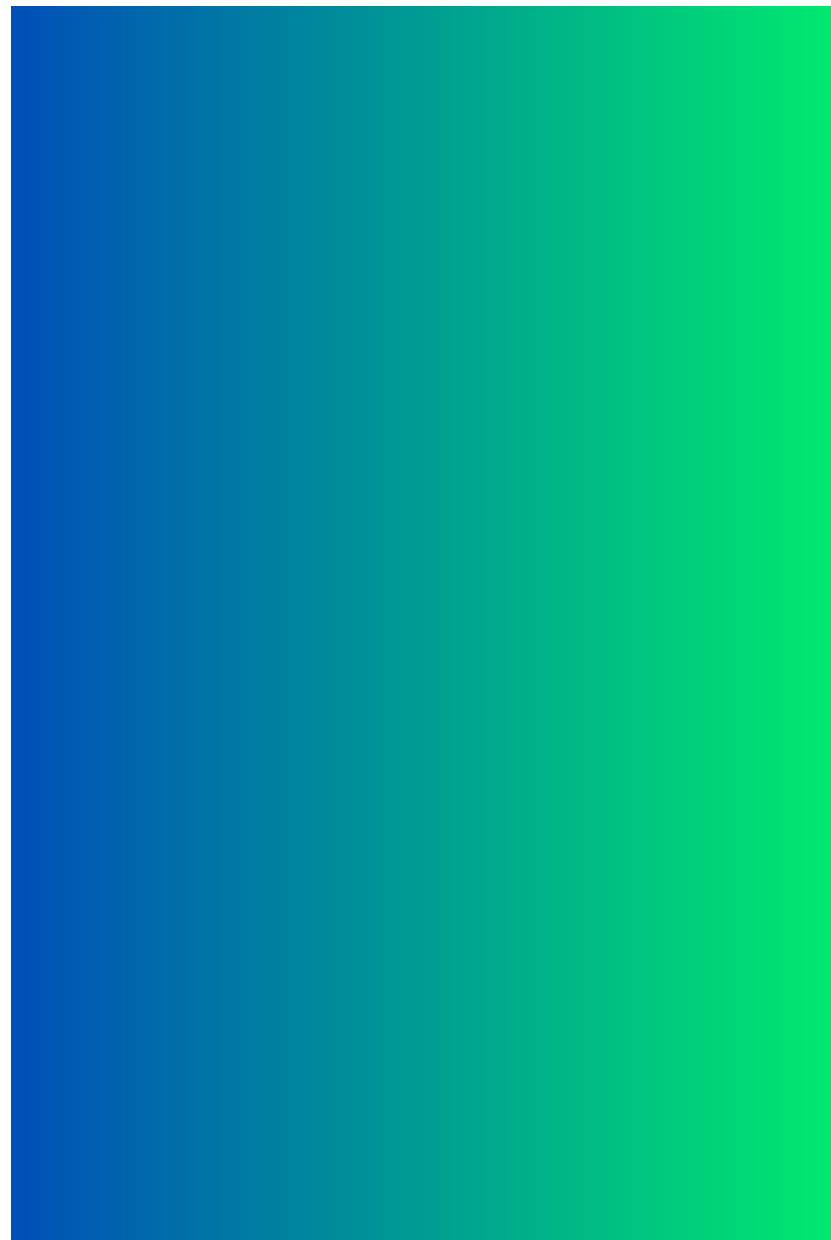

*Towards the Mediterranean Capital
of the Technological Industry, Digital
Entrepreneurship and the New Urban
Economy.*

Alicante Futura gives its name to the municipal strategic initiative aimed at structuring the main lines of **the future of the city of Alicante**. A future necessarily **linked to the field of innovation and the digital revolution**.

Developed in coordination with municipal actors such as the **Investment Attraction Office** and the **Department of New Technologies**, the initiatives sponsored by Alicante Futura are based both on the reality of our **territory** and on the **strengths and potential of our productive ecosystem**.

Alicante Futura was created to promote and highlight the role that the city of Alicante plays in the New Economy, advocating an **enrichment and diversification of our production model, stimulating the emergence and arrival of new technology-based projects** in the city and guiding its traditional sectors on an essential path towards progress.

To achieve this, this ambitious strategy with a global vocation that promotes and structures **initiatives, clusters, hubs, specialized spaces, workshops and meetings** that are extraordinarily diverse in their typology and objectives.

All of them, however, are oriented towards achieving a common goal: to ensure and make evident **Alicante's role as the Mediterranean Capital of the Technology Industry, Digital Entrepreneurship and the New Urban Economy.**

A NETWORK OF SPACES THAT ARE READY FOR THE FUTURE

Futura Territories.

A strategic initiative of the magnitude of Alicante Futura requires the existence of a **series of spaces** that make possible the development of a large part of the activities linked to it. The Future Territories Network was created to **boost the culture and entrepreneurial spirit of Alicante**. To attract and provide our technological and digital talent with the tools, knowledge, support and advice from specialised trainers and professionals.

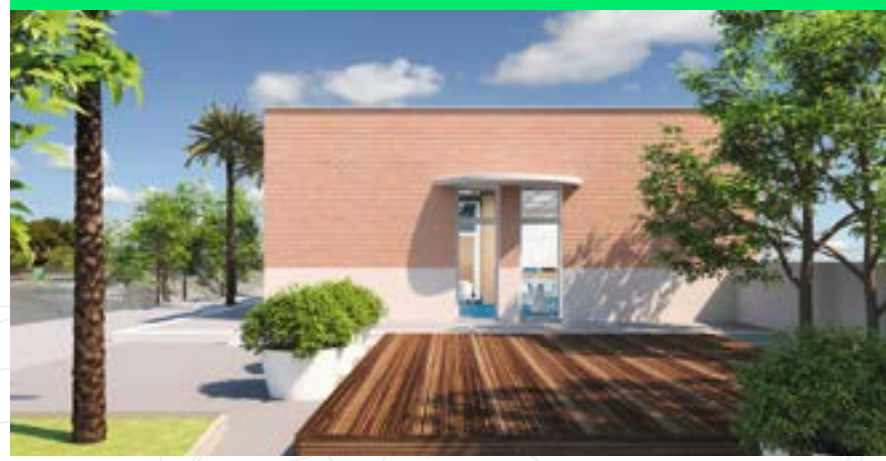

The Futura Territories Network, which is essential to turn Alicante into one of the most innovative and digital capitals of the Mediterranean arc, already has **eight connected spaces distributed throughout the different districts of the city**. Other Territories will be added to them as the project progresses and their needs evolve, configuring a selection of spaces capable of hosting a wide range of initiatives and objectives throughout the year.

UNA RED DE ESPACIOS PREPARADO PARA EL FUTURO

Futura.
(Antiguo
Matadero)

Vivero y
lanzadera
de Empresas
Príncipe Felipe
(Avda. de Elche)

Centro Emprendedores
(Calle Cid)

Centro de Emprendedores.

A centre specialised in business training whose objective is to train and provide entrepreneurs with the necessary tools to plan their business initiative in the best conditions of viability. It also has the capacity to provide **personalised advice** aimed at facilitating the start-up of the activities to be developed, especially oriented towards the **preparation of the Business Plan**, the **search for financing and access to subsidies**, all framed within a process of **technical accompaniment and specialized training** that supports the entrepreneur during the implementation and consolidation of his or her business initiative.

Monte Tossal

The main headquarters of Alicante Futura LAB and an authentic Makerspace; a **creative space** where professionals and groups of creators can come together to **align visions and efforts**, sharing and exploiting a variety of tools, materials, resources and knowledge to build and create their own projects.

Espacio Vaillo

Framed in the context of a new territorial and urban strategy for the city of Alicante, integrated in the EDUSI strategy. This space was created to **host and promote specialized training in the Cultural and Creative Industries**, which plays a fundamental role in the economic, urban and social development of Alicante and in the Alicante Futura strategy itself.

Las Cigarreras

A space included in the Edusi strategy where the work of professionals in the field of the creative economy, who are the foundation of **Alicante's cultural identity**, is valued and which was created to be the **headquarters of the Cluster of Creative Industries and Innovation** linked to **Alicante Futura**.

Gymnasio de las ideas

A public-private project developed in collaboration with the mixed company Aguas de Alicante, this space is **the headquarters of the Blue Economy Cluster**, and advocates a **work system that is viable and efficient**, capable of using responsibly all those resources close to our environment, developing a different way of looking at business, sustainable entrepreneurship and innovations.

Mercalicante

A collaborative space with an investment of 350,000 euros, designed as **the headquarters of the Agri-Food Hub** and developed in direct collaboration with Mercalicante. The aim is to provide a **unique environment for improving the competitiveness of agri-food companies**, providing an unbeatable location to favour the development of logistics and distribution operations.

Príncipe Felipe Business Incubator and Launching Pad.

Planned as the **headquarters of the Biotechnological Industries Cluster**, this space will be the site of a forthcoming municipal intervention that will **extend its facilities with 10 new warehouses**. The investment for this extension is €2,254,790. Once the project is completed, the incubator will consist of a **total of 22 warehouses** mainly for the biotechnology industry.

Ágora Futura

An ambitious project in which €9,529,977 will be invested, and in which a **multi-purpose and functional space** will be created to generate an important **pole of attraction for innovation and research**. Here, companies with a high technological impact will be able to find their space and have within their reach a **set of advantages and services with high added value** for their growth and with connections to the ecosystem.

This Ágora was created with the vocation of offering the necessary instruments and tools to facilitate the growth of technology-intensive companies, in order to promote and strengthen the ecosystem and the digital and innovative economic network, with the aim of **fostering technology and knowledge transfer** that achieves results and offers added value to companies and society.
